

# SLOPING BOTTOM BAR

For Extreme MicroCoil Grille - 500K Cycles

CornellCookson's new low profile sloping bottom bar for the Extreme MicroCoil Grille allows for a continuous uniform grille versus the traditional, bulkier pitch plates giving your opening a highly aesthetic, finished look.

## TRADITIONAL PITCH PLATE STYLE

Standard grilles that require the use of a sloping bottom bar will use a traditional sloping bottom bar that includes a pitch plate.

## NEW MICROCOIL SLOPING BOTTOM BAR

Extreme MicroCoil Grilles that require the use of a sloping bottom bar will feature this highly aesthetic compact solution.

## ENHANCED SECURITY

In addition to enhancing the look of a sloped grille, this new sloping bottom bar enhances security too. The way it is engineered to slope makes the grille heavier - also making it more difficult to lift. Enhanced security and enhanced aesthetics - a win-win scenario.

**AVAILABLE IN  
ALUMINUM AND  
STAINLESS STEEL!**
